Purpose

This report presents the findings of testing conducted on the website ‘Wobi’, An Israeli company that compares different types of insurance, such as car insurance, house insurance and travel insurance. The tests performed by one tester and were mainly checking the UI/UX and the functionality of the website.

The website was divided to different areas to make sure all parts of the website will be covered.

Website Overview

Wobi website is an online tool designed to help users compare insurance plans. The types of insurance comparison are car insurance, house insurance, mortgage insurance, travel insurance, health and life insurance.

Wobi collaborates with a variety of insurance companies in Israel, allowing users to compare prices and features across multiple providers. The platform simplifies the insurance selection process by providing a comprehensive and user-friendly interface where customers can compare and purchase insurance policies online.

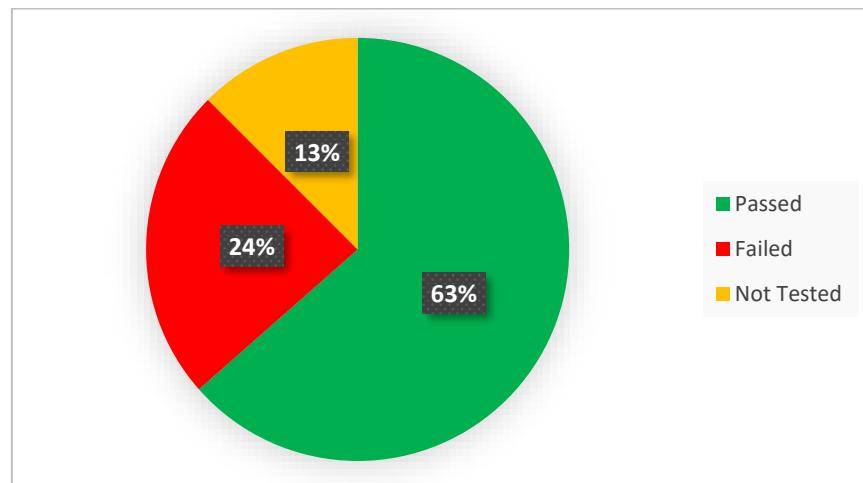

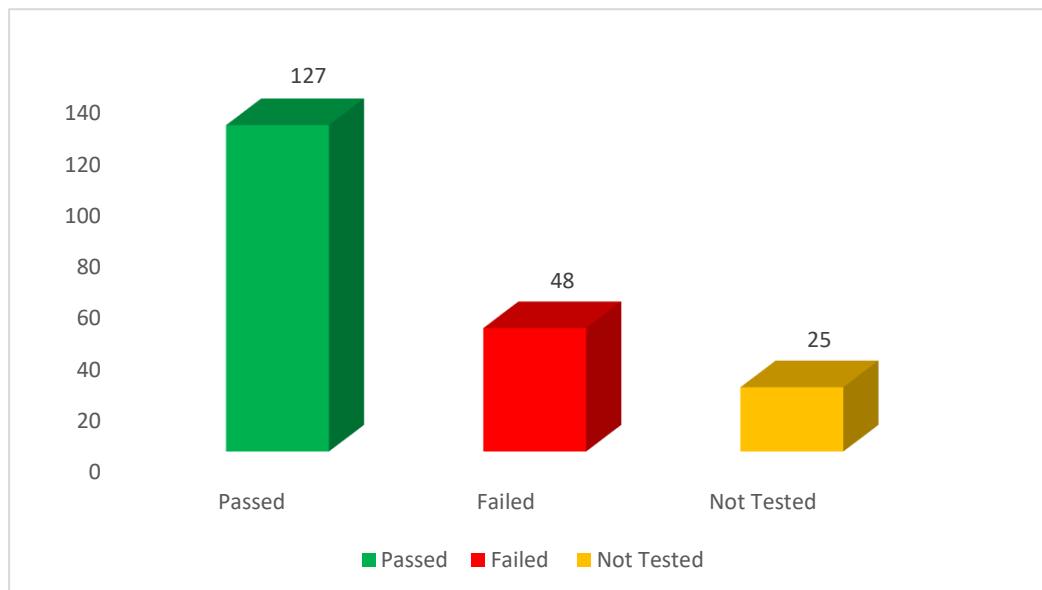

In addition to its comparison tools, Wobi website offers plenty of extra information on all types of insurance. Users can find numerous short articles filled with valuable insights and tips.

Metrics for Wobi Website

S1 - Critical	0	0	0
S2 - Major	4	0	0
S3 - Medium	17	1	0
S4 - Low	2	22	2
Total	23	23	2

Recommendations

The functionality of Wobi website is good, users can easily find insurance comparison prices and get offers from various insurance companies. The process of buying an online insurance is user friendly, But the UI of the website needs some improvement, since most of the bugs found are GUI and UI.

These are some recommendations for improving the website:

1. Fixing all email links in the website, these are not major issues but it will make the UX better.
2. Adding correct error messages when entering wrong information will also make the UX better.
3. Fixing the compatibility of the website on mobile devices.
4. Fixing all the misspellings and graphic issues, mostly in the articles section.
5. The website is in Hebrew only and users that are non-Hebrew speakers can't use it, so it would be recommended to add different languages options (English, Arabic and Russian for example).

Conclusion – GO

Although many bugs were found on Wobi website during the test cycle, most of them are low severity and mostly UI/UX.

The main functions of the website are working well and users can easily compare different types of insurances, choose an option and pay online.

TO CONCLUDE THE FINDINGS OF THE TESTINGS:

THE RECOMMENDATION IS TO RELEASE WOBI WEBSITE
