Michal Fadel • Rockford, MI • michalfadel19@gmail.com • Linkedin

QA Engineer with experience testing complex web applications in Agile environments. Brings a strong ability to adapt and quickly learn new products and business processes, translating that understanding into meaningful test coverage. Incorporates AI tools into testing, and currently expanding to automation.

Professional Experience:

Associate QA Engineer | **DMA - DuCharme, McMillen & Associates, Inc.** | May 2026 – September 2026

- Reviewed business requirements, user stories, and acceptance criteria to identify testing needs, flag clarifications early, and verify software behaved as expected before release.
- Proactively met with the product owner to understand business processes, translating that knowledge into accurate test scenarios and test cases for new features and software changes.
- Executed manual functional, regression, exploratory, and smoke testing to identify defects and verify software quality across releases.
- Improved regression documentation by reviewing existing scenarios and collaborating with QA teammates to expand coverage, resulting in zero related defects in the next release.
- Investigated defects using application logs and API responses, documenting clear reproduction steps in Jira, and collaborated with developers through resolution and retesting.

QA Analyst | **El Al Israeli Airlines** | January 2025 – February 2026

- Executed manual, functional, regression, and end-to-end UAT testing across web applications and backend systems to validate software changes and ensure reliable functionality.
- Performed functional and exploratory testing of web and mobile applications to uncover usability issues and validate behavior against requirements and end-user expectations.
- Created and maintained test cases in Xray based on requirements, executing structured test cycles for new features and enhancements.
- Used Chrome DevTools and Postman to investigate data inconsistencies, isolating root causes across frontend, backend, and API behavior.
- Documented and tracked defects in Jira with clear reproducible steps and collaborated with developers and product owners in Agile ceremonies serving as the team's Scrum Master.

Education and professional courses:

Automation College - Gal Matalon | **QA and Automation studies** | 2024

- Completed hands-on training across the QA lifecycle, including test planning, defect reporting, and Agile SDLC practices.
- Performed database testing using SQL (JOIN queries) and API testing with Postman; developed STP, STD, and STR documentation for web and mobile testing projects.

Emek Israel College, Israel | **Bachelor of Arts (BA) in Communication and Media Studies** | 2006

Skills:

Testing & Management Tools: Jira, Xray, TestRail, YouTrack
API Testing & Debugging: Postman, Swagger, Chrome DevTools
Testing Methodologies: Manual, Functional, Regression, Exploratory, Smoke, UAT, Agile/Scrum, SDLC/STLC
Automation: Playwright (learning), Selenium WebDriver (academic project experience)
Technologies: SQL (JOIN queries), HTML, CSS, XML, JSON, Java, Git/GitHub, Basic CI/CD concepts

Languages: Hebrew - Native, English – Fluent
